Snowy Monaro Regional Council

Council fees that are statutory in nature, which are externally set by another Government body and therefore are subject to control outside of Council, will be brought to Council's attention by way of a Council report for notation and adoption throughout the year if these externally set fees change. These externally set fees will not be advertised in advance for 28 days in accordance with the *Local Government Act 1993* since Council cannot determine the amount of the fee.

Development Application Related Fees EP&A Regulation 2021 - Schedule 4

The Environmental Planning and Assessment Regulation 2021 sets fees for various applications and certificates, which are listed in Schedule 4 of the Regulation.

The Regulation sets a 'fee unit' which is adjusted annually. For the 2023/2024 financial year, the 'fee unit' is \$107.28.

For many items, fees are expressed in terms of a number of fee units (as a 'base fee') plus an additional dollar amount determined by the value of the application, or (as an example) for a subdivision, the number of additional lots created.

Fees calculated by reference to a fee unit must be rounded to the nearest dollar, and an amount of 50 cents must be rounded down.

No refund of Application Fees will be made where a determination has been made, including a Resolution of Council. No refund of Application fees will be made where the request for withdrawal is made after two (2) calendar months from lodgement, or for application other than "Local Development". 50% Refund of Application fees will be made where the request for withdrawal is made within two (2) calendar months of lodgement. Note: This applies to "Local Development" only i.e. excludes Integrated Development and Designated Development. All requests for withdrawal and refunds must be made in writing.

Council determines an estimated cost of small scale residential development at a rate based on \$2,000 m2 for dwelling houses and dual occupancies and \$850/ m2 for outbuildings, and ancillary structures. For all other types of development the estimated cost is based on the full cost of erection, construction or demolition as per the EP&A Regulation 2021. All Development Application fees are GST Exempt.

Section 7.11 and 7.12 Contributions (formerly Section 94 and 94A Development Contributions)

Section 7.11 and 7.12 Contributions

Council collects contributions from developers to provide local infrastructure and facilities under section 7.11 and section 7.12 of the Environmental Planning and Assessment Act 1979. These funds are essential to ensure our infrastructure meets the needs of our growing population.

Snowy Monaro Section 7.12 Local Infrastructure Contributions Plan 2022

Refer - Snowy Monaro Section 7.12 Local Infrastructure Contributions Plan 2022

This plan commenced on July 2022 and applies to the entire local government area, except the area to which the Michelago Plan applies. Contributions are levied as a percentage of the cost of carrying out the development. This plan applies to most types of development, except for those which do not generate demand for additional local infrastructure.

Michelago Local Infrastructure Plan 2021 (Hybrid Section 7.11 & 7.12)

Refer - Michelago Local Infrastructure Plan 2021 (Hybrid Section 7.11 & 7.12)

This plan applies to the Michelago Village and surrounds and the R5 Large Lot Residential area. This Plan is a hybrid plan and the contribution will depend on the type of development. All non-residential development is subject to a Section 7.12 levy

Section 64 Contributions

Section 64 funds are allocated to be spent on providing additional infrastructure as contained in Council's Capital Program. Contributions are based on Council's existing Approved Developer Calculations and NSW Water Directorate Guidelines.

Snowy Monaro Development Servicing Plan (DSP)

Refer - Snowy Monaro Development Servicing Plan (DSP) 2023

This DSP document supersedes any other requirements related to water supply and sewerage developer charges for the areas covered by the DSP. The DSP takes precedence over any of Council's code or policies where there are any inconsistencies relating to water supply and sewerage developer charges.

Waste Services

It is the responsibility of residents and commercial customers to look after their bins. If a bin goes missing it is up to the resident/business owner to find it. Each bin has a unique serial and/or chip number which can be provided to assist with finding the missing bin. If the missing bin is not found it needs to be replaced at the cost of the resident/business owner.

Replacement bin costs are as per adopted fees and charges.

Council must be contacted to arrange payment. Council may not deliver the replacement bin until payment has been received. If the missing bin is found after the resident has paid for a replacement Council will refund the replacement cost and collect the replacement bin.

Any waste and recycling bins that are damaged by residents, tenants, or business owners will need to be replaced at the cost of the resident/business owner. Damage may include, but is not limited to, melting with hot ash, private vehicular damage etc.

Replacement charges are per adopted fees and charges. Council must be contacted to arrange payment and delivery of a replacement bin. MGB = Mobile Garbage Bin

Council will only collect waste and recycling bins that have been issued by Council.

For major commercial waste and recycling collection contracts, the General Manager has the authority to negotiate a competitive price that does not create a financial loss for Council.

In-kind support for events must be requested in advance, as per the Council Donation and Sponsorship process.

Waste Disposal Charges at Council Waste Facilities

1. A weighbridge is utilised to determine charges at Jindabyne & Cooma landfills.
2. The conversion rates for the following products are:
 - Mixed unsorted waste 1m³ = 0.33t
 - Concrete 1m³ = 1.5t
 - Bricks, tile rubble 1m³ = 1.2t
 - Wood/timber 1m³ = 0.3t
 - Mixed Builders Waste 1m³ = 0.43t
 - Reprocessed concrete 1m³ = 1.7t
 - Green Waste 1m³ = 0.15t
- These rates are used to convert Councils price per tonne to cubic metre for Councils waste sites where there is no weigh bridge.
3. Definition of Household Waste is defined as putrescible waste and recycling that is generated from the day to day running of a residential household. Household waste does not include construction or demolition waste, mattresses, tyres, computer monitors/televisions, and or batteries.
4. A landfilling fee may not apply to waste that is deemed by the landfill attendant to be recyclable and is properly sorted. Where waste is clearly recyclable and is not sorted a mixed waste fee will apply.
5. Asbestos is not accepted at Bombala & Delegate or the Transfer Stations.
6. Plasterboard is charged as Mixed Building waste (no Asbestos).
7. Under POEO (Waste) Regulations 2014, Council can no longer offer mulched woodchip product received for sale to the public unless it is processed as per the Fertilisers Act 1985. Council currently does not have approvals or the facility to conduct 'composting processes' of these products. Therefore, charges will apply for Green Waste received at waste facilities (including but not limited to pre mulched woodchips) from commercial and domestic sources .
8. VENM containing 150mm particles or larger will be charged as rubble. What is VENM - Virgin Excavated Natural Material. The Protection of the Environment Operations Act 1997 (POEO Act) defines virgin excavated natural material (VENM) as: 'natural material (such as clay, gravel, sand, soil or rock fines):
 - (a) that has been excavated or quarried from areas that are not contaminated with manufactured chemicals, or with process residues, as a result of industrial, commercial, mining or agricultural activities; and
 - (b) that does not contain any sulfidic ores or soils or any other waste
9. Council charges a standard price for mattresses regardless of size as the recycler that collects those charges Council a flat rate regardless of size.
10. In a severe storm event Council may accept green waste for a specified period, determined by Council, at no cost.
11. In the event of the E-Waste stewardship program no longer supporting Snowy Monaro Regional Residents, Council reserves the right to commence charging for any E-Waste received at Council Waste Facilities.
12. Any customer that is abusive to Council staff or does not follow staff directions at any of Councils' waste facilities may be refused entry and may be banned from using Councils' waste facilities in the future.
13. Under POEO (Waste) Regulation 2014, Tractor and Heavy plant tyres over 1.5m will not be accepted at any Snowy Monaro Regional Council Waste Facilities.
14. Due to State Government legislation, any product containing refrigerant taken to a waste facility will be charged a fee for the degassing of the unit. An exemption from the fee will be granted if the person disposing of the unit can demonstrate that it has been degassed by an authorised technician.
15. For those clients that wish to dispose of waste and receive a monthly invoice an application for debtor account is required prior to disposing waste at Councils waste facilities. Fees are invoiced monthly and non-payment within Councils terms may result in the suspension of account until outstanding amounts are paid. Invoice Terms are 14 days. An overdue fee will be charged for all reminder notices on overdue accounts. (Refer to revenue policy).
16. Michelago & Smith's Road Collection Points - Council will only accept domestic quantities of household mixed unsorted waste and recyclables.

Water & Sewer

General Principle:

For equity purposes it was imperative to harmonise the water and sewer fees and charges region wide. To avoid large increases the harmonising was phased over 2 years.

For the purpose of raising charges under section 501 of the Local Government Act 1993, Snowy Monaro Regional Council deems an occupancy to be each house, flat, strata unit, dual occupancy etc. that is connected or unconnected to the water and wastewater service within the region.

Previously, Bombala and Cooma-Monaro residents were charged access charges on the Rates notice. Following system integration in July 2021 all residents will receive access charges on the Water/Sewer notices.

1. An Allotment is defined as a parcel of land with a unique lot, section and DP number.
 2. Connections will only be allowed to Council's mains by Council. It is prohibited to connect to Council's trunk mains including rising mains and gravity mains. Any extensions to the reticulation mains must meet Council's standards and will be at the cost of the developer/customer.
 3. The Access Charge shall apply to all vacant land that is within 225m of a water main and 75m of a sewer main in accordance with Section 552 of the Local Government Act 1993.
- In accordance with Section 404 and Section 501 of the Local Government Act 1993 the following charges apply in the 2021 year;

Access Charge (Section 501 of Act)

- Business and Mining consumers
- Residential and Farmland consumers

Usage Charge (Section 502 of the Act)

- Business and Mining consumers
- Residential and Farmland consumers

Billing of strata units (Policy)

The charging of strata properties and rural bulk meters shall be as follows:

- a) Reading of Main Meter/Parent meter only – When a group of strata units, flats, or dual occupancies are served by one parent water meter, Council will read the main parent meter only and all water that passes through this meter shall be billed to the Body Corporate / Owner
- b) It is the Body Corporate's responsibility to apportion the usage charges between the individual strata
- c) The Access Charges shall be billed to each strata owner individually.
- d) In instances where body corporates have not been set up and child meters need to be read by Council, each owner of the strata property will be charged for additional meter reading (Refer charge under "Other fees").

Tri-annual Billing (Policy)

Council has a tri-annual billing system. The tri-annual periods commence in June, October and February. This applies throughout the Council area.

Meter Flow Test (for accuracy purposes)	\$323.50	\$337.00	per meter	N	N
Refunded if found to be faulty. NOTE: - If a customer disputes the water consumption reading the following steps shall be carried out before any consideration will be given to amending the account. - Council will ensure the meter is re-read by an authorised person to validate the reading and inform the customer of the outcome. - If the customer is not satisfied with the outcome and the customer still disputes the reading, the customer may request in writing for either of the following tests to be carried out with the payment of the appropriate fees: - 1. For Council to conduct an inline flow test passing min of 200 litres through the consumer and test meter in series (Cost of testing shall be as indicated in the Fees and Charges); or 2. For an independent test and report from a NATA accredited workshop (Cost of testing shall be "at cost" based on the NATA accredited workshop fee current at the time of payment plus 15% administration fee). In this instance Council shall remove the inline meter to send off to the workshop and replace it with a temporary meter. - If the meter is recording correctly, the customer will not be reimbursed cost of the test and no changes shall be made to the water account. - If the meter is found to be faulty, the customer will be reimbursed the cost of the test and the meter will be replaced at no cost to the customer. A review of the water consumption shall be based on 3 previous readings for the same period. - The customer may request to witness the test and any associated costs of witnessing the test shall be the customers responsibility.
